The Red Cabinet Gives the CIA enough to Investigate in Denmark
Says Expert in Files

We have to realize, that the American Intelligence Service, the CIA, probably is very interested in what is going on in Denmark. Especially after the recent political development with the forming of what is called "the red cabinet".

There is no doubt that both the American Embassy and the NATO have files, which to a certain extent correspond to those used by the Danish Police--thus a registration of "those with diverging opinions", Author Mads Nissen Styrk says to Information. Styrk writes in his book "The Many Files", which will be issued by AROS, a publishing firm in Aarhus, that the reduction which must have taken place in the Danish files cannot be expected to comprise the other registration centers.

The NATO and Denmark

Have we actually realized, that the eyes of the CIA are resting heavily on Denmark? he asks. We ought to remember, that we are members of the NATO, and that the American Government must be specially interested in knowing, if it can count on our membership after 1969.

In my opinion the American Embassy in Copenhagen is surprisingly large compared to the country. In the book about the CIA, "The Invisible Government", it says that the American Intelligence Service still is in contact with about 60 similar organs in other countries. I am not for one moment in doubt that there is not just a line but a heavy rope between the Danish organ and the CIA, Styrk says.

As a proof of the fact that the American Intelligence Service is operating in Denmark, the book mentions an example from Lyndon B. Johnson's visit in Copenhagen, while he still was Vice-President.
